Required knowledge

Players should know html, css, javascript, steganography and some coding and encryption to pass the different levels

How to prepare the Escape Room

1. Run an apache web server to upload the web.

2. Upload the php files and the folders css, imagenes and js.

3. Prepare a computer with the following user:
   a. **Username**: vladimir
   b. **Password**: Rusia

   NOTE: This computer must have ssh access.

4. Copy the file docs/pass to vladimir's home folder.

5. Change the ip of the **level13.php** file to the computer with ssh access.

How to start the Escape Room

1. Split people into groups of 4-5.

2. Give them the ip of the web server and enjoy it.

NOTE: you have the passwords in the keys document in the docs folder
